**INNOVATIVE SYSTEMS & SOLUTIONS JOINS RICOH AMERICAS
CORPORATION'S TECHNOLOGY ALLIANCE PROGRAM**

West Caldwell, NJ, October 2, 2007 – Ricoh Americas Corporation today announced Innovative Systems & Solutions, Ltd., a leader in high-quality, professional computer-related technology services, software and hardware products, has joined Ricoh's Technology Alliance Program. The company's products may be integrated with Ricoh's eCabinet and DocumentMall, allowing customers to achieve seamless workflow between computer workstations and multifunction products (MFPs).

Innovative Systems & Solutions' entrance into the Technology Alliance Program arrives on the heels of the launch of its newest product, the Java eCabinet Link (JeCL). JeCL connects the eCabinet with MFPs to create premium usability and efficiency for users. The program enables the eCabinet archive to be accessible from the MFP's touch screen, and by doing so, helps users manage their documents more effectively. Walk-up users can index documents in the eCabinet folders, scan documents directly to the archive and search eCabinet remotely from a personal computer. Additionally, JeCL streamlines document management duties by eliminating the need for an intermediate server. Optionally, with the addition of an intermediate PC/server, JeCL has the ability to distribute workloads and handle barcoding and scanning operations, which are critical in today's work environment.

“We are proud to continue our relationship with Ricoh through the Technology Alliance Program,” said Dave Kiewra, president, Innovative Systems & Solutions. “Our products

coupled with Ricoh devices, enable MFP users to simplify their document management activities, creating a more functional and productive work environment.”

There are two divisions within the Alliance Program, the Strategic Alliance Program and the Technology Alliance Program. Innovative Systems & Solutions has joined the Technology Alliance Program, which is comprised of third party software, and hardware companies that specialize in niche solution offerings that complement Ricoh hardware and software technologies. ISS is also part of the Ricoh Developer Program™ (RiDP™) that provides software vendors, systems integrators, value-added resellers, and in-house developers with access to the support, tools and services needed to integrate solutions with Ricoh hardware and software products.

“Today’s business environment demands efficient, productive document management solutions that users can depend on and Ricoh is constantly researching new ways to provide premium service offerings to our customers,” said Hede Nonaka, senior vice president, Document Solutions & Services Division, Ricoh Americas Corporation.

“Innovative Systems & Solutions has a reputation for intelligent software solutions and we are proud to welcome the company into the Technology Alliance Program.”

About Innovative Systems & Solutions, Ltd.

Innovative Systems and Solutions Ltd. (“ISS LTD”), located in Little Falls, N.J., a privately held corporation, has proudly been providing business process automation solutions to its national customer base for more than 15 years, since 1992.

ISS LTD’s solutions leverage and integrate the functionality of products from industry leaders such as Ricoh Americas Corporation. ISS LTD’s total system offerings include document management systems; forms-based data capture solutions, document scanning and conversion services, and comprehensive PC, server, and network support. Optional modules enable ISS LTD systems to assist with organizations’ overall HIPPA, Sarbanes Oxley, or CFR Part 21 compliance goals.

ISS LTD actively partners with independent local dealers to implement cost-effective solutions throughout North, Central, and South America.

Additional information about ISS LTD’s solutions, product brochures, and trial software downloads may be found at www.issltd.com.
